

ASPHALTECH

WHY ASPHALTECH?

AsphalTech is polymer modified bitumen emulsion. It is mixed and applied as a cold mix, using standard paving equipment.

Furthermore, AsphalTech can be applied manually or by hand, where job and employment creation is important.

AsphalTech binder properties can reduce rutting, raveling, thermal cracking and stripping in the mix, as well as increase the durability and fatigue life.

BENEFITS OF ASPHALTECH:

- Utilize any non-plastic aggregate
- Cost effective
- Reduced potholes and cracking
- Can be used to repair existing conventional asphalts
- Environmentally friendly
- Pothole kits
- Reduced maintenance
- Job Creation

ISO 9001 & 14001

Job creation & skills transfer program included

Pre-packaged pothole kits

Free site inspection and quotation
